Vantify eLearning is on a mission to reinvent the impact that compliance training can have.

In our business, it's not enough to make someone aware of risks. That's par for the course. We've got to change people's behaviour. That can be a tall order for an eLearning course, but day-in, day-out, that's what we aspire to do.

We believe it's our duty to empower companies who are fighting the good fight. To turn them into what they should be: strong and resilient businesses. By thinking big, and starting small. By switching on one disengaged employee, with one really relevant course. We're pulling out the stops to turn compliance training from a 'necessary evil' to a 'necessary good'.

We see ourselves as warriors in a battle for hearts and minds. Experts at switching people on to the risks and pitfalls of today's commercial-ethical minefield. We believe that risk must be relevant; it must resonate and ring true. Embedding it in the consciousness of a testy employee – that's an art form, and one we excel at.

Our mission:

Drive
behavioural
change.

Our Promise

Information Security and Data Protection

Information Security and Data Protection

The true power of an organisation lies not in its data or technology, but in the people entrusted with managing, protecting, and utilising those assets responsibly. This human element, with its strengths and vulnerabilities, is at the heart of today's data-driven and technology-driven business environment.

Legislation such as the General Data Protection Regulation (GDPR) provides rigorous standards for handling personal data and imposes serious penalties for non-compliance. To help navigate this landscape, our suite of courses offers clear guidance on GDPR principles and global data protection norms, tailored to employees in diverse roles with varying degrees of data interaction.

Diversity and Inclusion

Diversity and Inclusion

The Diversity and Inclusion Suite trains staff to welcome people from all walks of life and treat others fairly and equally. This is something too important to be taught in simplistic or clichéd terms. The Vantify eLearning Suite includes engaging, nuanced, and sensitive modules in numerous formats that will help the learner understand the challenges different people face, and gain the wisdom to navigate the complex social and regulatory challenges of today's workplace.

Our training promotes the respect and inclusion of people of all different races, gender identities, sexual orientations, ages, and physical and mental differences. Courses help learners empathise with the challenges that different types of people face, spot harmful unintentional gestures, ally with and advocate for colleagues who need support, and manage problematic situations when needed. Special care is given to raising awareness of our unconscious biases and adapting our language to reflect and encourage a more inclusive work environment.

These topics will provide learners with a strong and solid framework from which they can contribute to a harmonious and diverse company culture while working better together as a team.

Performance and Leadership

Performance and Leadership

Great companies start with great employees, and managers who know how to bring out the best in them. The Vantify eLearning Performance and Leadership suite provides the tools to help bring all those elements together.

Communications training can help employees at all levels to give and receive effective feedback and gain the confidence to hold sensitive conversations with their co-workers. Managers sometimes struggle to manage and motivate workers, set individual and team objectives, and balance conflicting priorities and needs. Many people are afraid to even broach topics like mental health and stress in the workplace.

The Performance and Leadership Suite also includes courses on recruitment and customer support, essential but often overlooked functions that separate good companies from great ones. All courses are CPD-certified, come in different lengths and formats, and can be customised for your company's needs.
